FOR IMMEDIATE RELEASE

OneShield Tops Core Systems Metacategory in Celent's 2009 Insurance Software Deal Trends Report

June 17, 2009 – Westborough, MA – OneShield, Inc., the developer of OneShield Dragon®, an innovatively modern, rules- and tools-based, data-driven policy management suite for the property/casualty insurance market, announced today the company has been named a leading vendor in the Core Systems metacategory of Celent's 2009 Insurance Software Deal Trends report.

"We would like to extend our congratulations to OneShield for being named as a leading vendor," said Craig Weber, senior vice president of the Celent insurance practice. "We believe carriers value partners who know the insurance vertical well, and who demonstrate their commitment to it. OneShield's success in insurance clearly puts them in that category."

Also in the recently published "P/C Policy Administration Systems 2009: Personal and Commercial Lines," Celent noted OneShield showed well in the ABCD Vendor Chart, in both the breadth of functionality and advanced technology categories, proving inherent base functionality in 6 out of the 7 categories reviewed.

"OneShield Dragon is one of the most modern systems available and has remained high on the Celent ABCD scale for several reports," noted the report. "The ability to customize and configure the solution without requiring code will allow carriers to maintain a high value with lower costs."

"OneShield is pleased with the success and acclaim we have received this year especially as we celebrate our 10th anniversary," said Glenn Anschutz, president and CEO of OneShield. "We have worked very hard to provide our customers with the most modern architecture and breadth of functionality they require and it's nice to know that our staff's dedication is paying off."

About OneShield

OneShield, Inc. is the developer of OneShield Dragon®, an innovatively modern, rules and tools-based, data-driven policy management suite for personal, commercial and specialty lines of the property/casualty insurance market. Dragon's highly configurable tool-set enables customers to configure all components by combining a defined standards-based business process with web-enabled components, including underwriting, rating, workflow, compliance management, CRM and policy administration so insurance organizations can deploy new products faster and manage existing business better. **For additional information, visit www.oneshield.com.**
