**FOR IMMEDIATE RELEASE**

**OneShield Dragon® and ImageRight Announce Availability of Integration  
New Alliance Drives Insurance Automation for Mutual Clients**

**January 6, 2009 – Westborough, MA** – OneShield, Inc., the developer of OneShield Dragon®, an innovatively modern, rules and tools-based, data-driven policy management suite for the property and casualty insurance market, announced today the availability of out-of-the box integration with the insurance industry’s leading content management and workflow system, ImageRight. This alliance will have an immediate positive impact for mutual clients in terms of driving insurance automation.

“Implementing the integration of our OneShield Dragon and ImageRight products was a strategic choice for our business,” said Patrick Porter, vice president and controller for MONTPELIER US. “Now, we are able to seamlessly transfer information between the two solutions for new business, endorsements and cancellation for our general liability products. It has definitely helped us streamline and automate processes.”

The integration of OneShield Dragon and ImageRight marks a significant offering for insurance carriers, major brokers and managing general agents (MGAs) in the insurance industry. Communication between the two products is based on the latest technology available through Web Services, the use of ftp and XML standards.

“ImageRight is one of the most successful and well-recognized companies in the industry”, said Heather Peacock, senior vice president of sales and customer service for OneShield. “We are always looking for opportunities to enhance our customers’ investment in OneShield. We know the pre-defined integration between our systems will allow our mutual customers to leverage a strong product mix to run their businesses.”

Both companies have achieved industry recognition from analysts and customers alike for their modern, insurance-based offerings.

“OneShield is one of the premiere policy management suites available in the market today and they share our customer satisfaction philosophy,” said Bob Helvey, channel manager for ImageRight. “We have several mutual clients who are already seeing the benefits of integrating the two products, and we see many more taking advantage of this offering.”
