

oneShield Acquires *ebis* Billing Application

March 2007 Westborough, MA

oneShield, Inc., a leading provider of innovative technology driven policy administration, automated business rules and workflow solutions to the property and casualty insurance industry, today announced they have acquired the *ebis* insurance billing application from Mellon Financial Corporation to further expand their Dragon product offering. *ebis*, or Electronic Billing Insurance System is an integrated billing and accounts receivable software application for property and casualty insurance.

“We are very pleased to announce the addition of the *ebis* billing product to our already comprehensive Web- based Dragon policy administration platform commented Chief Executive Officer Glenn Anschutz. oneShield searched the market in pursuit of a well established robust billing solution that would complement their Dragon technology. “The *ebis* application met our expectations in functionality, technology and customer-centric features, this is a good fit for oneShield and our future product strategy,” Anschutz added.

“With a focused emergence from carriers on delivering best-of-class service levels and the need for rapid customer response to critical information, we felt it was essential to add a billing component to our Dragon suite,” remarked Heather Peacock, Senior Vice President of Sales and Client Services. “Adding billing to our product offering clearly positions oneShield to offer a comprehensive component based business solution to the market.”.

“The oneShield Dragon solution will provide a significant amount of leveragability to the *ebis* platform and its existing customers,” Anschutz added. “We are confident that the integration of the products will provide an extremely powerful solution to the insurance industry.”

Dragon is a configurable data driven policy administration solution that incorporates an insurance knowledgebase engine with the tools necessary to define, deploy and manage a carrier’s products and services. With Dragon, workflow processes are seamless and the investment in legacy applications is preserved. Dragon supports all personal and commercial lines of business in all 50 U.S. states.

###

About oneShield, Inc.

oneShield is a leading provider of browser-based solutions to automate the sales and service of insurance and bond products for insurance carriers, major brokers, and MGAs. Our flagship product, oneShield Dragon[®], is a tools-based, data-driven insurance underwriting, policy administration, rating and workflow engine. Dragon provides the configurability to meet today’s goals and the modifiability to adapt to future demands.
