

## **OneShield adds Workers Compensation**

**March 27, 2006** (Westborough, MA.) - OneShield, Inc., a provider of innovative technology driven policy administration and automated workflow solutions to the property and casualty insurance industry, today announced they have added support for workers compensation to their Dragon product portfolio.

"I am very pleased to announce the addition of workers compensation to our already comprehensive web based commercial lines platform," commented CEO, Glenn Anschutz. The decision to add the workers compensation line of business was a logical choice driven by both carriers and MGA's. "Carriers and MGA's recognize the need for a solution built with new technology standards that provide efficient, value added features and functionality. Dragon meets this need and empowers them to configure and maintain their products giving them greater flexibility and control," added Anschutz.

Dragon is a configurable data driven policy administration solution that incorporates an insurance knowledgebase engine with the tools necessary to define, deploy and manage a carrier's products and services. With Dragon, workflow processes are seamless and the investment in legacy applications is preserved. Dragon supports all personal and commercial lines of business in 50 states.

### **About OneShield, Inc.**

OneShield is a leading provider of browser-based solutions to automate the sales and service of insurance and bond products for insurance carriers, major brokers, and MGAs. Our flagship product, OneShield Dragon®, is a tools-based, data-driven insurance underwriting, policy administration, rating and workflow engine. Dragon provides the configurability to meet today's goals and the modifiability to adapt to future demands. For additional information, visit [www.oneshield.com](http://www.oneshield.com).
